

Grant Thornton

An instinct for growth™

Assurance

Creating value for growth-oriented businesses

“ “ As one of the largest accounting firms, Grant Thornton understands how important audited financial statements are to businesses, shareholders/owners, lenders, investors and other stakeholders.

We work with some of the country's most successful private and public companies. Our approach is to first understand the business and the risks it faces and then to focus our efforts where it matters most. Our method is both effective and cost efficient. ” ”

Dynamic growth-based organisations want a deep insight into the real performance of their business, whatever its size or nature, an audit achieves this.

An audit seeks to provide a real overview of the financial performance of a business, whilst improving an entities efficiency and profitability. This is achieved through the insightful financial results which an audit can uncover, such data allows key stakeholders to make calculated risks, whilst assessing elements within the financial structure which may need improvements.

As a client of Grant Thornton, you can rest assured that the reported financial results are fair and meet the necessary international standards. Our Partners are involved at key stages of an audit, thereby offering you the level of quality and accuracy of conclusions which you would expect from a dynamic global organisation.

By listening carefully to your strategic objectives and giving you a framework to facilitate your decision making, we can provide a robust challenge to your proposals and an independent, commercial perspective for you to consider.

At Grant Thornton, we believe that no value is added if audit firms are mostly there to rubber stamp opinions. With our expertise and close partner involvement together with the significant pool of experience, true value is added.

- Audit Assurance
